Macy's, Inc. Reports Fourth Quarter and FY2015 Results

***Diluted 2015 EPS is \$3.22, or \$3.77 as adjusted, exceeding guidance;
Company provides 2016 sales and earnings guidance***

CINCINNATI--(BUSINESS WIRE)-- Macy's, Inc. (NYSE:M) today reported fiscal 2015 earnings per diluted share of \$3.22, or \$3.77 per diluted share excluding asset impairments, store closing and other costs. The company's fourth quarter and full-year sales and earnings exceed the company's most recent guidance.

"While 2015 was challenging, our sales trend improved in January as the weather turned colder in northern climate zones and Macy's and Bloomingdale's were well-stocked in coats, boots, sweaters, gloves, hats and other seasonal goods. As the year ended, our inventories were in good shape (up by 0.7 percent on a comp basis)," said Terry J. Lundgren, chairman and chief executive officer of Macy's, Inc. "We are encouraged by the way the business responded going into 2016, and we believe we are well positioned to stabilize sales levels this year as we lay the foundation for enhanced shareholder value and sustained, long-term profitable growth. Given our determination to rise above our disappointing 2015 performance, I have reminded my team that our setback last year is a setup for our comeback.

"Moving ahead, Macy's remains rooted in the M.O.M. strategies that have resonated with customers seeking fashion, value, quality and convenience as customers shop us in stores and digitally. But we are redefining, updating and redirecting our efforts in each letter of M.O.M. to carry us forward – with My Macy's evolving from localization to personalization, Omnichannel now focused on providing Omni Choices for customers, and engaging customers by making Magic Connections," Lundgren said. "After the previous six consecutive years of cumulative success, 2015 reminded us that retailing is a dynamic business that requires continuous reinvention as the customer evolves. Today, we are examining every aspect of our business so we can grow profitable sales and re-attain our goal over time of an EBITDA rate as a percent of sales of 14 percent.

"We should not lose sight of the investments we made in 2015 that will help us down the road. We registered yet another year of double-digit growth in our online business, fueled by exceptional increases in mobile traffic and increased conversions, with exciting new offerings from macys.com and bloomingdales.com. We expanded our online capacity with a new state-of-the-art fulfillment center in Tulsa, OK. We announced licensed department arrangements with companies including LensCrafters, Men's Wearhouse and Best Buy to add new categories to the Macy's store assortment. We completed the acquisition of Bluemercury, which added capabilities to our signature beauty business. We developed and launched Macy's Backstage, which will be piloted as an in-store concept this spring. And we began initial testing of online selling in China in a new joint venture with a Hong Kong-based partner," he added.

For the full year 2015, adjusted earnings (excluding items described below) were \$3.77 per diluted share. Due primarily to higher sales and lower expenses, this exceeds the company's most recent guidance for 2015 earnings of \$3.54 to \$3.59 on the same basis. Comparable sales on an owned plus licensed basis in the full-year 2015 declined by 2.5 percent. This compares to the most recent guidance for 2015 sales on an owned plus licensed basis to be down 2.7 percent. On an owned basis, full-year 2015 comparable sales declined by 3.0 percent.

Important Information Regarding Non-GAAP Financial Measures

(All amounts in millions except percentages)

The Company reports its financial results in accordance with generally accepted accounting principles (GAAP). However, management believes that certain non-GAAP financial measures provide users of the Company's financial information with additional useful information in evaluating operating performance. See the table below for supplemental financial data and a corresponding reconciliation to the most directly comparable GAAP financial measures. This non-GAAP financial measure should be viewed as supplementing, and not as an alternative or substitute for, the Company's financial results prepared in accordance with GAAP. Certain of the items that may be excluded or included in this non-GAAP financial measure may be significant items that could impact the Company's financial position, results of operations and cash flows and should therefore be considered in assessing the Company's actual financial condition and performance. Additionally, the amounts received by the Company on account of sales of departments licensed to third parties are limited to commissions received on such sales. The methods used by the Company to calculate its non-GAAP financial measures may differ significantly from methods used by other companies to compute similar measures. As a result, any non-GAAP financial measures presented herein may not be comparable to similar measures provided by other companies.

Macy's, Inc. believes that providing changes in comparable sales on an owned plus licensed basis, which includes the impact of growth in comparable sales of departments licensed to third parties supplementally to its results of operations calculated in accordance with GAAP assists in evaluating the Company's ability to generate sales growth, whether through owned businesses or departments licensed to third parties, on a comparable basis, and in evaluating the impact of changes in the manner in which certain departments are operated.

Decrease in comparable sales on an owned plus licensed basis	<u>(4.3)%</u>	<u>(2.5)%</u>

Notes:

- (1) Represents the period-to-period change in net sales from stores in operation throughout the year presented and the immediately preceding year and all online sales, excluding commissions from departments licensed to third parties.

- (2) Represents the impact of including the sales of departments licensed to third parties occurring in stores in operation throughout the year presented and the immediately preceding year and via the Internet in the calculation of comparable sales. The Company licenses third parties to operate certain departments in its stores and online and receives commissions from these third parties based on a percentage of their net sales. In its financial statements prepared in conformity with GAAP, the Company includes these commissions (rather than sales of the departments licensed to third parties) in its net sales. The Company does not, however, include any amounts in respect of licensed department sales (or any commissions earned on such sales) in its comparable sales in accordance with GAAP (i.e. on an owned basis). The Company believes that the amounts of commissions earned on sales of departments licensed to third parties are not material to its results of operations for the periods presented.
